

Slides and Course Notes for Jacobs University*

Michael Kohlhasse
Jacobs University, Bremen
<http://kwarc.info/kohlhasse>

December 29, 2013

Abstract

We present a document class from which we can generate both course slides and course notes in a transparent way. Furthermore, we present a set of L^AT_EX XML bindings for these, so that we can also generate OMDoc-based course materials, e.g. for inclusion in the ACTIVEMATH system.

*Version ? (last revised ?)

1 Introduction

This Document class is derived from `beamer.cls`, specializes it with Jacobs stuff and adds a notes version that is more suited to printing than the one supplied by `beamer.cls`.

2 The User Interface

2.1 Package Options

The `mikoslides` class takes a variety of class options:¹

- | | | |
|-------|---------------------------|--|
| EdN:1 | <code>showmeta</code> | • <code>qshowmeta</code> . If this is set, then the metadata keys are shown (see [Koh13] for details and customization options). |
| | <code>slides</code> | • The options <code>slidesnd</code> <code>notesnotes</code> switch between slides mode and notes mode (see Section 2.2). |
| | <code>a</code> | |
| EdN:2 | <code>sectocframes</code> | • If the option <code>sectocframes</code> is given, then special frames with section table of contents are produced headers ² |

2.2 Notes and Slides

2.3 Header and Footer Lines

2.4 Colors and Highlighting

`\textwarning` The `\textwarning` macro generates a warning sign: 

2.5 Front Matter, Titles, etc

2.6 Miscellaneous

3 Limitations

In this section we document known limitations. If you want to help alleviate them, please feel free to contact the package author. Some of them are currently discussed in the `gTEXTRAC` [sTeX].

1. the class should be divided into concerns. [sTeX], issue 1684
2. when option `book` or `report` is given together with `sectocframes` chapter-level omgroups generate a spurious slide with a bare heading. This has something to do with the fact that beamer does not support `\chapter`

4 The Implementation

The `mikoslides` package generates two files: the `LATEX` package (all the code between `<*package>` and `</package>`) and the `LATEXML` bindings (between `<*ltxml>`

¹EdNOTE: leaving out noproblems for the moment until we decide what to do with it.

²EdNOTE: document the functionality

and `\ltxml`). We keep the corresponding code fragments together, since the documentation applies to both of them and to prevent them from getting out of sync.

4.1 Initialization and Class Options

For the \LaTeX bindings, we make sure the right perl packages are loaded.

```
1 \ltxml
2 # -*- PERL -*-
3 package LaTeXML::Package::Pool;
4 use strict;
5 use LaTeXML::Package;
6 \ltxml
```

For \LaTeX we define some Package Options and switches for the `mikoslides` class and activate them by passing them on to `beamer.cls` the appropriate packages.

```
7 \cls
8 \DeclareOption{showmeta}{\PassOptionsToPackage{\CurrentOption}{metakeys}}
9 \newif\ifnotes\notesfalse
10 \newif\ifsectocframes\sectocframesfalse
11 \newif\ifproblems\problemstrue
12 \DeclareOption{notes}{\notesttrue}
13 \DeclareOption{slides}{\notesfalse}
14 \DeclareOption{nopproblems}{\problemsfalse}
15 \DeclareOption{sectocframes}{\sectocframestrue}
```

the next two define the `frontmatter` environment so that the later `\renewcommand` does not lead to trouble.

```
16 \newif\if@part\@partfalse
17 \DeclareOption{report}{\@parttrue\PassOptionsToClass{\CurrentOption}{omdoc}}
18 \DeclareOption{book}{\@parttrue\PassOptionsToClass{\CurrentOption}{omdoc}}
19 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{omdoc}\PassOptionsToClass{\CurrentOption}{b
20 \ProcessOptions
21 \cls
22 \ltxml
23 RawTeX('\newif\ifnotes\notesfalse');
24 RawTeX('\newif\ifproblems\problemsfalse');
25 \ltxml
```

Depending on the options, we either load the `article`-based `omdoc` or the `beamer` class. In the first case, we also have to make the `beamer`-specific things available to `article` via the `beamerarticle` package. We use options to avoid loading theorem-like environments, since we want to use our own from the \TeX packages.

```
26 \cls
27 \ifnotes
28 \LoadClass{omdoc}
29 \RequirePackage{a4wide}
```

```

30 \RequirePackage{marginnote}
31 \RequirePackage{mdframed}
32 \RequirePackage[notheorems,noamsthm,noxcolor]{beamerarticle}
33 \else
34 \if@part% report or book class
35 \renewenvironment{frontmatter}{}{}
36 \fi
37 \LoadClass[notheorems,noamsthm,10pt]{beamer}
38 \newcounter{Item}
39 \newcounter{paragraph}
40 \newcounter{subparagraph}
41 \newcounter{Hfootnote}
42 \usetheme{Jacobs}
43 \fi
44 \</cls>
45 \<*ltxml>
46 LoadClass('omdoc');
47 RequirePackage('tikzinput');
48 DefConstructor('\usetheme{'','');
49 \</ltxml>

```

EdN:3

now, we load the remaining packages for both versions. ³

```

50 \<cls>
51 \RequirePackage{tikzinput}
52 \RequirePackage{stex}
53 \RequirePackage{latexml}
54 \RequirePackage{amssymb}
55 \RequirePackage{tikz}
56 \usepgflibrary{shapes}
57 \usetikzlibrary{arrows}
58 \usetikzlibrary{positioning}
59 \usetikzlibrary{tikzmark}%experimental/beta but very useful
60 \usetikzlibrary{fit}
61 \RequirePackage{url}
62 \RequirePackage{amsmath}
63 \RequirePackage{comment}
64 \RequirePackage{standalone}
65 \RequirePackage{textcomp}
66 \</cls>
67 \<*ltxml>
68 RequirePackage('stex');
69 RequirePackage('latexml');
70 RequirePackage('amssymb');
71 RequirePackage('graphicx');
72 RequirePackage('tikz');
73 RequirePackage('url');
74 RequirePackage('amsmath');
75 \</ltxml>

```

³EDNOTE: MK: eventually (when tikz support is fully realized in \LaTeX ML) get rid of the standalone package

4.2 Notes and Slides

We define the sizes of slides in the notes. Somehow, we cannot get by with the same here.

```

76 <*cls>
77 \newcounter{slide}
78 \newlength{\slidewidth}\setlength{\slidewidth}{12.5cm}
79 \newlength{\slideheight}\setlength{\slideheight}{9cm}
80 </cls>
81 <*ltxml>
82 DefRegister('\slidewidth'      => Dimension('13.5cm'));
83 DefRegister('\slideheight'    => Dimension('9cm'));
84 </ltxml>

```

For course notes, we define the `note` environment to be a no-operation otherwise we declare the `note` environment as a comment via the `comment` package.

`note`

```

85 <*cls>
86 \ifnotes\renewenvironment{note}{\ignorespaces}{\else\excludecomment{note}\fi}
87 </cls>
88 <*ltxml>
89 DefEnvironment('{note}', '#body');
90 </ltxml>

```

the next step is to set up the slide boxes in `article` mode. We set up sizes and provide a box register for the frames and a counter for the slides.

```

91 <*cls>
92 \ifnotes
93 \newlength{\slideframewidth}\setlength{\slideframewidth}{1.5pt}
94 </cls>

```

`frame` We redefine the `itemize` environment so that it looks more like the one in `beamer` with `Jacobs` theme. We create the box around the frame with a later `\surroundwithmdframed`.

```

95 <*cls>
96 \addmetakey{frame}{label}
97 \addmetakey[yes]{frame}{allowframebreaks}
98 \addmetakey{frame}{allowdisplaybreaks}
99 \addmetakey[yes]{frame}{fragile}
100 \addmetakey[yes]{frame}{shrink}
101 \addmetakey[yes]{frame}{squeeze}
102 \renewenvironment{frame}[1][[]]{%
103 {\metasetkeys{frame}{#1}%
104 \stepcounter{slide}\def\@currentlabel{\theslide}%
105 \ifx\frame@label\empty\else\label{\frame@label}\fi}
106 \def\itemize@level{outer}%
107 \def\itemize@outer{outer}%
108 \def\itemize@inner{inner}%

```

```

109 \renewcommand\newpage{}%
110 \renewcommand\metakeys@show@keys[2]{\marginnote{\scriptsize ##2}}%
111 \renewenvironment{itemize}%
112 {\ifx\itemize@level\itemize@outer\def\itemize@label{\$ \rhd$}\fi%
113 \ifx\itemize@level\itemize@inner\def\itemize@label{\$ \scriptstyle\rhd$}\fi%
114 \begin{list}%
115   {\itemize@label}%
116   {\setlength{\labelsep}{.3em}\setlength{\labelwidth}{.5em}\setlength{\leftmargin}{1.5em}}%
117   \edef\itemize@level{\itemize@inner}}%
118 {\end{list}}
119 \begin{mdframed}[linewidth=\slideframewidth,skipabove=1ex,skipbelow=1ex,
120 userdefinedwidth=\slidewidth,align=center]\sf}
121 {\medskip\miko@slidelabel\end{mdframed}}
122 \end{cls}
123 \ltxml
124 DefEnvironment('frame'[],
125   "<omdoc:omgroup layout='slide'>"
126   . "#body\n"
127   . "</omdoc:omgroup>\n\n",
128   afterDigestBegin=>sub {
129     $_[1]->setProperty(theory=>LookupValue('current_module')); });
130 \ltxml)#$

```

the next step is to set up the slide boxes in `article` mode.

```

131 \end{cls}
132 \renewcommand{\frametitle}[1]{\Large\bf\sffcolor{blue}{#1}\medskip}
133 \fi
134 \makeindex
135 \end{cls}
136 \ltxml
137 DefConstructor('\frametitle'[,
138   "\n<omdoc:metadata><dc:title>#1</dc:title></omdoc:metadata>");
139 \ltxml)

```

We start by giving the L^AT_EX binding for the `frame` environment from the `beamer` class. The `note` environment is used to blend out text in the `slides` mode. It does not have a counterpart in OMDoc.

```

140 \end{cls}
141 \ifproblems\newenvironment{problems}{}{}\else\excludecomment{problems}\fi
142 \end{cls}
143 \ltxml
144 DefEnvironment('problems', '#body');
145 \ltxml)

```

4

⁴EDNOTE: subtitle is difficult to model in DC metadata. I guess that we want to collect the subtitle into `dc:title`

4.3 Header and Footer Lines

Now, we set up the infrastructure for the footer line of the slides, we use boxes for the logos, so that they are only loaded once, that considerably speeds up processing.

```
146 <*cls>
147 \newlength{\slidelogoheight}
148 \ifnotes\setlength{\slidelogoheight}{.4cm}\else\setlength{\slidelogoheight}{1cm}\fi
149 \newsavebox{\slidelogo}\sbox{\slidelogo}{\includegraphics[height=\slidelogoheight]{jacobs-logo}}
```

Now, we set up the copyright and licensing, the copyright remains with the author, but we use the Creative Commons Attribution-ShareAlike license to strengthen den public domain. Here the problem is that we want a hyperref on the CC logo, if hyperref is loaded, and otherwise not. As hyperref is always loaded, we have to find out at the beginning of the document whether it is, set up a switch, and later in the footer line decide what to do.

```
150 \def\source{Michael Kohlhasse}% customize locally
151 \def\copyrightnotice{\footnotesize\copyright:\hspace{.3ex}{\source}}
152 \newsavebox{\cclogo}\sbox{\cclogo}{\includegraphics[height=\slidelogoheight]{cc_somerights}}
153 \newif\ifcchref\cchreffalse
154 \AtBeginDocument{\@ifpackageloaded{hyperref}{\cchreftrue}{\cchreffalse}}
155 \def\licensing{\ifcchref\href{http://creativecommons.org/licenses/by-sa/2.5/}{\usebox{\cclogo}}
```

EdN:5

Now, we set up the slide label for the article mode⁵

```
\slidelabel
156 \newcommand\miko@slidelabel%
157 {\vbox to \slidelogoheight{\vss\hbox to \slidewidth%
158 {\licensing\hfill\copyrightnotice\hfill\arabic{slide}\hfill\usebox{\slidelogo}}}}
159 </cls>
```

4.4 Colors and Highlighting

Now, we set up an infrastructure for highlighting phrases in slides. Note that we use content-oriented macros for highlighting rather than directly using color markup. The first thing to do is to adapt the green so that it is dark enough for most beamers

```
160 <*cls>
161 \AtBeginDocument{\definecolor{green}{rgb}{0,.5,0}\definecolor{purple}{cmyk}{.3,1,0,.17}}
```

We customize the `\defemph`, `\notemph`, and `\stdMemph` macros with colors for the use in the `statements` package. Furthermore we customize the `\@@lec` macro for the appearance of line end comments in `\lec`.

```
162 % \def\STpresent#1{\textcolor{blue}{#1}}
163 \def\defemph#1{{\textcolor{magenta}{#1}}}
164 \def\notemph#1{{\textcolor{magenta}{#1}}}
165 \def\stdMemph#1{{\textcolor{blue}{#1}}}
```

⁵EDNOTE: see that we can use the themes for the slides some day. This is all fake.

```

166 \def\@lec#1{(\textcolor{green}{#1})}
167 \end{class}
168 \end{document}
169 #DefMacro('defemph','{\textcolor{magenta}{#1}}');
170 #DefMacro('notemph','{\textcolor{magenta}{#1}}');
171 \end{document}

```

I like to use the dangerous bend symbol for warnings, so we provide it here.

`\textwarning` as the macro can be used quite often we put it into a box register, so that it is only loaded once.

```

172 \end{class}
173 \pgfdeclareimage[width=.9em]{miko@small@dbend}{dangerous-bend}
174 \def\smalltextwarning{\pgfuseimage{miko@small@dbend}\xspace}
175 \pgfdeclareimage[width=1.5em]{miko@dbend}{dangerous-bend}
176 \def\textwarning{\raisebox{-.05cm}{\pgfuseimage{miko@dbend}}\xspace}
177 \pgfdeclareimage[width=2.5em]{miko@big@dbend}{dangerous-bend}
178 \def\bigtextwarning{\raisebox{-.05cm}{\pgfuseimage{miko@big@dbend}}\xspace}
179 \end{class}
180 \end{document}
181 DefMacro('textwarning','@textwarning\xspace');
182 DefConstructor('textwarning','');
183 \end{document}

```

4.5 Front Matter, Titles, etc

We need to redefine the frontmatter macros inherited from the `beamer` class, since there they take an optional argument.

```

184 \end{document}
185 DefMacro('title[]{}', '@add@frontmatter{ltx:title}{#1}');
186 DefMacro('date[]{}', '@add@frontmatter{ltx:date}[role=creation]{#1}');
187 DefMacro('author[]{}', sub { andSplit(T_CS('@author'),$_[1]); });#$
188 \end{document}

```

Now, we specialize the slide environment that we have implemented above or inherited from `seminar.cls` for some abbreviations, e.g. separator slides and title slides.

```

188 \end{class}
189 \ifnotes\newcommand\titleframe{\maketitle}\else
190 \newcommand\titleframe{\begin{frame}\titlepage\end{frame}}\fi
191 \newenvironment{titleframewith}{\begin{frame}\titlepage}{\end{frame}}
192 \newenvironment{tttitle}{\begin{center}\LARGE\begin{tabular}{|c|}\hline}%
193 {\hline\end{tabular}\end{center}\vspace{1ex minus 1ex}}
194 \newenvironment{tttitlejoint}[1]%
195 {\newbox\boxwith\setbox\boxwith\hbox{\begin{tabular}{c}{\em joint work with}\#1\end{tabular}}}%
196 \begin{center}\LARGE\begin{tabular}{c}\color{red}}%
197 {\box\boxwith\end{tabular}\end{center}}%
198 \vspace{1ex minus 1ex}}
199 \end{class}
200 \end{document}

```

```

201 DefConstructor('\titleframe',"<omdoc:ignore>titleframe elided here</omdoc:ignore>");
202 DefEnvironment('{titleframewith}',
203               "<omdoc:ignore>begin elided titleframe</omdoc:ignore>"
204               . "#body"
205               . "<omdoc:ignore>end elided titleframe</omdoc:ignore>");
206 DefEnvironment('{titleslide}', "");
207 DefEnvironment('{titleslide}', "<omdoc:omgroup>#body</omdoc:omgroup>");
208 DefEnvironment('{ttitle}', "\n<dc:title>#body</dc:title>");
209 </ltxml>

210 %      Must be first command on slide to make positioning work.
211 <*cls>
212 \newcommand\putgraphicsat[3]{%
213   \begin{picture}(0,0)\put(#1){\includegraphics[#2]{#3}}\end{picture}}
214 \newcommand\putat[2]{\begin{picture}(0,0)\put(#1){#2}\end{picture}}
215 </cls>

```

4.6 Sectioning

If the `sectocframes` option is set, then we make section frames.

```

216 <*cls>
217 \ifsectocframes
218 \if@part\newcounter{mpart}
219 \newcounter{mchapter}
220 \newcounter{msection}[mchapter]
221 \else
222 \newcounter{msection}
223 \fi
224 \newcounter{msubsection}[msection]
225 \newcounter{msubsubsection}[msubsection]
226 \newcounter{msubsubsubsection}[msubsubsection]
227 \ifnotes\else% only in slides
228 \renewcommand\at@begin@omgroup[3][\begin{frame}%
229 \vfill\Large\centering
230 \red{\ifcase\section@level\or
231 \stepcounter{mpart}Part \Roman{mpart}\or%
232 \stepcounter{mchapter}Chapter \arabic{mchapter}\or
233 \stepcounter{msection}\if@part\arabic{mchapter}.\fi\arabic{msection}\or
234 \stepcounter{msubsection}\if@part\arabic{mchapter}.\fi\arabic{msection}.\arabic{msubsection}\or
235 \stepcounter{msubsubsection}\if@part\arabic{mchapter}.\fi\arabic{msection}.\arabic{msubsection}
236 \stepcounter{msubsubsubsection}\if@part\arabic{mchapter}.\fi\arabic{msection}.\arabic{msubsecti
237 \quad #3}\vfill
238 \end{frame}}
239 \fi% ifnotes
240 \fi% ifsectocframes
241 </cls>

```

4.7 Miscellaneous

We need to disregard the columns macros introduced by the `beamer` class

```

242 <*cls>
243 \ifnotes
244 \renewenvironment{columns}%
245 {\par\noindent\begin{minipage}\slidewidth\centering\leavevmode}%
246 {\end{minipage}\par\noindent}
247 \newsavebox\columnbox
248 \renewenvironment{column}[1]%
249 {\begin{lrbox}{\columnbox}\begin{minipage}{#1}}%
250 {\end{minipage}\end{lrbox}\usebox\columnbox}
251 \fi
252 </cls>
253 <*ltxml>
254 DefEnvironment('{columns}',"#body");
255 DefEnvironment('{column}{}',"#body");

```

We also need to deal with overlay specifications introduced by the `beamer` class.⁶

```

256 DefConstructor('\uncover','#1');
257 #Define a Beamer Overlay Parameter type
258 DefParameterType('BeamerOverlay', sub {
259   my ($gullet) = @_;
260   my $tok = $gullet->readXToken;
261   if (ref $tok && ToString($tok) eq '<') {
262     $gullet->readUntil(T_OTHER('>'));
263   } else {
264     $gullet->unread($tok) if ref $tok;
265     undef; }},
266   reversion=> sub {
267     (T_OTHER('<'), $_[0]->revert, T_OTHER('>'));
268   });
269
270 #Take the "from" field of the overlay range
271 sub overlayFrom {
272   return "" unless defined $_[0];
273   my $overlay=ToString($_[0]); $overlay =~ /\^(d+)/; $1;}
274
275 #Reuse the CMP itemizations, only adjust the \item constructors.
276 DefMacro('\beamer@group@item[] OptionalBeamerOverlay IfBeginFollows', sub {
277   my($gullet,$tag,$overlay,$needwrapper)=@_;
278   $overlay=$overlay||T_OTHER("");
279   ( T_CS('\group@item@maybe@unwrap'),
280     ($needwrapper ? (Invocation(T_CS('\beamer@group@item@wrap'),$tag,$overlay)->unlist) : ()) )
281 DefConstructor('\beamer@group@item@wrap {} OptionalBeamerOverlay',

```

⁶EDNOTE: this is just to keep latexml quiet, no real functionality here.

⁷EDNOTE: Deyan: We reuse the CMP itemizations defined in the omdoc.cls.ltxml binding, adjusting the parameters to be overlay-sensitive

```

282      "<omdoc:omtext ?#2(overlay='&overlayFrom(#2)')()>"
283      . "?#1(<dc:title>#1</dc:title>())"
284      . "<omdoc:OMP>",
285      beforeDigest=>sub {
286      Let('\group@item@maybe@unwrap', '\group@item@unwrap');
287      #$_[0]->bgroup;
288      return; },
289      properties=>sub{ RefStepItemCounter(); });
290 #DefConstructor('\beamer@itemize@item[] OptionalBeamerOverlay',
291 #      "<omdoc:li ?#2(overlay='&overlayFrom(#2)')() >"
292 #      . "?#1(<dc:title>#1</dc:title>())",
293 #      properties=>sub{ RefStepItemCounter(); });
294 DefConstructor('\beamer@enumerate@item[] OptionalBeamerOverlay',
295      "<omdoc:li ?#2(overlay='&overlayFrom(#2)')() >"
296      . "?#1(<dc:title>#1</dc:title>())",
297      properties=>sub{ RefStepItemCounter(); });
298 DefConstructor('\beamer@description@item[] OptionalBeamerOverlay',
299      "<omdoc:di ?#2(overlay='&overlayFrom(#2)')() >"
300      . "?#1(<omdoc:dt>#1</omdoc:dt>())<omdoc:dd>", # trust di and dt to autoclose
301      properties=>sub{ RefStepItemCounter(); });
302 </ltxml>#&

```

Now, some things that are imported from the `pgf` and `beamer` packages:

```

303 <*ltxml>
304 DefMacro('\putgraphicsat{}{}{}', '\mygraphics[#2]{#3}');
305 DefMacro('\putat{}{}', '#2');
306 </ltxml>

```

4.8 Finale

Finally, we set the slide body font to the sans serif, and we terminate the `LATEX`ML bindings file with a success mark for perl.

```

307 <cls>\ifnotes\else\sf\fi
308 <ltxml>1;

```
