## 1 Setting up Semantic References

**In a nutshell:** How to set up semantic references? Easy, just use the `omgroup` environment from the `omdoc` package.

## 2 Testing the References

Now, we test the referencing mechanism

**Internal Referencing:** First single references: `?scr@setup?` and `?scr@testing?`, and then compound ones: `?scr@setup?` and `?scr@testing?`

**External Referencing:** First single references: `[?, Section 1]` and `[?, Section 2]`
