Making Crossreferences

in the omgroup

Referencing across Documents

Now, we test the referencing mechanism

Internal Referencing: First single references: ?idc@mcr? (p. ??) and ?idc@rad? (p. ??), and then compound ones: ?idc@mcr? and ?idc@rad?

External Referencing: First single references: [SCR, ??] (p. ??) and [SCR, ??] (p. ??)

References

[SCR] Jane Doe Semantic Crossreferencing Personal communication.
