

# Semantic Crossreferencing

Jane Doe

March 20, 2019

## Setting up Semantic References

**In a nutshell:** How to set up semantic references? Easy, just use the `omgroup` environment from the `omdoc` package.

## Testing the References

Now, we test the referencing mechanism

**Internal Referencing:** First single references: Section 1 and Section 2, and then compound ones: Section 1 and Section 2

**External Referencing:** First single references: [?, ??] and [?, ??]
