Slides and Course Notes for Jacobs University*

Michael Kohlhase Jacobs University, Bremen http://kwarc.info/kohlhase

November 18, 2015

Abstract

We present a document class from which we can generate both course slides and course notes in a transparent way. Furthermore, we present a set of Late XML bindings for these, so that we can also generate OMDoc-based course materials, e.g. for inclusion in the ActiveMath system.

^{*}Version ? (last revised ?)

Introduction 1

This Document class is derived from beamer.cls [Tana], specializes it with Jacobs stuff and adds a notes version that is more suited to printing than the one supplied by beamer.cls.

2 The User Interface

The mikoslides class takes the notion of a slide frame from Till Tantau's excellent beamer class and adapts its notion of frames for use in the STFX and OMDoc. To support semantic course notes, it extends the notion of mixing frames and explanatory text, but rather than treating the frames as images (or integrating their contents into the flowing text), the mikoslides package displays the slides as such in the course notes to give students a visual anchor into the slide presentation in the course (and to distinguish the different writing styles in slides and course notes).

In practice we want to generate two documents from the same source: the slides for presentation in the lecture and the course notes as a narrative document for home study. To achieve this, the mikoslides class has two modes: slides mode and notes mode which are determined by the package option.

2.1Package Options

mode (see Section 2.2).

The mikoslides class takes a variety of class options: 1

slides a

sectocframes

showmeta

of contents are produced headers ² showmeta. If this is set, then the metadata keys are shown (see [Koh15] for details and customization options).

• The options slides notes notes switch between slides mode and notes

• If the option sectocframes is given, then special frames with section table

frameimages

• If the option frameimages is set, then slide mode also shows the \frameimagegenerated frames.

2.2Notes and Slides

frame note Slides are represented with the frame just like in the beamer class, see [Tanb] for details. The mikoslides class adds the note environment for encapsulating the course note fragments.¹

Note that it is essential to start and end the notes environment at the start of the line – in particular, there may not be leading blanks – else IATEX becomes confused and throws error messages that are difficult to decipher.

EdN:2

EdN:1

 $^{^{1}\}mathrm{EdNote}$: leaving out noproblems for the moment until we decide what to do with it.

²EDNOTE: document the functionality

¹MK: it would be very nice, if we did not need this environment, and this should be possible in principle, but not without intensive LaTeX trickery. Hints to the author are welcome.

```
\begin{note}
  We start this course with ...
\end{note}
\begin{frame}
  \frametitle{The first slide}
\end{frame}
\begin{note}
  ... and more explanatory text
\end{note}
\begin{frame}
  \frametitle{The second slide}
\end{frame}
. . .
```

Example 1: A typical Course Notes File

By interleaving the frame and note environments, we can build course notes as shown in Figure 1.

Sometimes, we want to integrate slides as images after all – e.g. because we already have a PowerPoint presentation, to which we want to add STEXnotes. In this case we can use $\Gamma = [\langle opt \rangle] \{\langle path \rangle\}$, where $\langle opt \rangle$ are the options of \includegraphics from the graphicx package [CR99] and $\langle path \rangle$ is the file path (extension can be left off like in \includegraphics).

Header and Footer Lines 2.3

Colors and Highlighting

\textwarning

\frameimage

The \textwarning macro generates a warning sign:

2.5 Front Matter, Titles, etc

2.6 Miscellaneous

Limitations

In this section we document known limitations. If you want to help alleviate them, please feel free to contact the package author. Some of them are currently discussed in the STFXGitHub repository [sTeX].

1. when option book which uses \pagestyle{headings} is given and semantic macros are given in the omgroup titles, then they sometimes are not defined

3

by the time the heading is formatted. Need to look into how the headings are made. This is a problem of the underlying omdoc package.

4 The Implementation

The mikoslides package generates two files: the LATEX package (all the code between $\langle *package \rangle$ and $\langle /package \rangle$) and the LATEXML bindings (between $\langle *ltxml \rangle$ and $\langle /ltxml \rangle$). We keep the corresponding code fragments together, since the documentation applies to both of them and to prevent them from getting out of sync.

The general preamble for LATEXML:

```
1 \*Itxml.cls | Itxml.sty\\
2 # -*- CPERL -*-
3 package LaTeXML::Package::Pool;
4 use strict;
5 use LaTeXML::Package;
6 \/ Itxml.cls | Itxml.sty\\
```

4.1 Class and Package Options

We define some Package Options and switches for the mikoslides class and activate them by passing them on to beamer.cls and omdoc.cls and the mikoslides package.

```
7 (*cls)
8 \newif\ifnotes\notesfalse
9 \DeclareOption{notes}{\notestrue\PassOptionsToPackage{\CurrentOption}{mikoslides}}
10 \DeclareOption{slides}{\notesfalse\PassOptionsToPackage{\CurrentOption}{mikoslides}}
11 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{omdoc}
                               \PassOptionsToClass{\CurrentOption}{beamer}
12
                               \PassOptionsToPackage{\CurrentOption}{mikoslides}}
13
14 \ProcessOptions
15 (/cls)
16 (*ltxml.cls)
17 DeclareOption(undef, sub {PassOptions('omdoc','cls',ToString(Digest(T_CS('\CurrentOption'))));
                                              PassOptions('mikoslides','sty',ToString(Digest(T_CS(
19 ProcessOptions();
20 (/ltxml.cls)
now we do the same for the mikoslides package. Note that we also have to define
the same switches<sup>3</sup>, since we might use mikoslides.sty in a different class.
21 (*package)
22 \newif\if@mikoslides@mh@\@mikoslides@mh@false
23 \DeclareOption{mh}{\@mikoslides@mh@true
```

\PassOptionsToPackage{\CurrentOption}{stex} \PassOptionsToPackage{\CurrentOption}{tikzinput}}

26 \newif\ifnotes\notesfalse

 $^{^3\}mathrm{EdNote}\colon\,\mathsf{MK}\colon\mathsf{we}$ may think about making all of them internal

```
27 \DeclareOption{notes}{\notestrue}
28 \DeclareOption{slides}{\notesfalse}
29 \newif\ifsectocframes\sectocframesfalse
31 \newif\ifframeimages\frameimagesfalse
32 \DeclareOption{frameimages}{\frameimagestrue}
33 \newif\if@part\@partfalse
35 \DeclareOption{book}{\@parttrue\PassOptionsToPackage{\CurrentOption}{omdoc}}
36 \neq \frac{1}{2}
37 \DeclareOption{noproblems}{\problemsfalse}
38 \DeclareOption*{\PassOptionsToPackage{\CurrentOption}{stex}
                          \PassOptionsToPackage{\CurrentOption}{tikzinput}}
40 \ProcessOptions
41 (/package)
42 (*ltxml.sty)
43 DeclareOption('notes', '');
44 DeclareOption('slides', '');
45 DeclareOption('noproblems', '');
46 DeclareOption('sectocframes', '');
47 DeclareOption('frameimages', '');
48 DeclareOption('mh', sub {RequirePackage('mikoslides-mh');});
49 DeclareOption(undef, sub {PassOptions('stex','sty',ToString(Digest(T_CS('\CurrentOption'))));
                                        PassOptions('tikzinput','sty',ToString(Digest(T_CS('\
50
51 ProcessOptions();
52 RawTeX('\newif\ifnotes\notesfalse');
53 RawTeX('\newif\ifproblems\problemsfalse');
54 (/ltxml.sty)
```

Depending on the options, we either load the article-based omdoc or the beamer class. In the first case, we also have to make the beamer-specific things available to article via the beamerarticle package. We use options to avoid loading theorem-like environments, since we want to use our own from the STEX packages. On the LATEXML side we just load the omdoc class and provide the \usetheme macro that would otherwise from the the beamer class.

```
55 (*cls)
56 \setminus ifnotes
    \LoadClass{omdoc}
57
    \RequirePackage{a4wide}
58
    \RequirePackage{marginnote}
59
    \RequirePackage{mdframed}
60
    \RequirePackage[notheorems,noamsthm,noxcolor]{beamerarticle}
61
62 \else
    \LoadClass[notheorems,noamsthm,10pt]{beamer}
63
   \newcounter{Item}
64
    \newcounter{paragraph}
65
    \newcounter{subparagraph}
66
    \newcounter{Hfootnote}
67
68
    \usetheme{Jacobs}
69 \fi
```

```
70 \RequirePackage{mikoslides}
71 (/cls)
72 (*ltxml.cls)
73 LoadClass('omdoc');
74 RequirePackage('mikoslides');
75 DefConstructor('\usetheme{}','');
76 (/ltxml.cls)
   now, we load the remaining packages for both versions.
77 (*package)
78 \if@mikoslides@mh@\RequirePackage{mikoslides-mh}\fi
79 \RequirePackage{stex}
80 \RequirePackage{smglom}
81 \RequirePackage{tikzinput}
82 \RequirePackage{latexml}
83 \RequirePackage{amssymb}
84 \RequirePackage{amsmath}
85 \RequirePackage{comment}
86 \RequirePackage{textcomp}
87 \RequirePackage{url}
88 (/package)
89 \langle *ltxml.sty \rangle
90 RequirePackage('stex');
91 RequirePackage('smglom');
92 RequirePackage('tikzinput', options => ['image']);
93 RequirePackage('latexml');
94 RequirePackage('amssymb');
95 RequirePackage('amsmath');
96 RequirePackage('graphicx');
97 RequirePackage('url');
98 (/ltxml.sty)
```

4.2 Notes and Slides

We define the sizes of slides in the notes. Somehow, we cannot get by with the same here.

```
99 \*package\)
100 \newcounter{slide}
101 \newlength{\slidewidth}\setlength{\slidewidth}{12.8cm}
102 \newlength{\slideheight}\setlength{\slideheight}{9cm}
103 \langle/package\)
104 \*ltxml.sty\)
105 DefRegister('\slidewidth' => Dimension('13.6cm'));
106 DefRegister('\slideheight' => Dimension('9cm'));
107 \/|txml.sty\>
```

note The note environment is used to leave out text in the slides mode. It does not have a counterpart in OMDoc. So for course notes, we define the note environment

to be a no-operation otherwise we declare the **note** environment as a comment via the **comment** package.

```
108 (*package)
109 \ifnotes%
110 \renewenvironment{note}{\ignorespaces}{}%
111 \else%
112 \excludecomment{note}%
113 \fi%
114 (/package)
115 (*ltxml.sty)
116 DefEnvironment('{note}','#body');
117 (/ltxml.sty)
```

We start by giving the LATEXML binding for the frame environment from the beamer class. We first set up the slide boxes in article mode. We set up sizes and provide a box register for the frames and a counter for the slides.

```
118 (*package)
119 \ifnotes
120 \newlength{\slideframewidth}
121 \setlength{\slideframewidth}{1.5pt}
```

frame We first define the keys.

```
122 \addmetakey{frame}{label}
123 \addmetakey[yes]{frame}{allowframebreaks}
124 \addmetakey{frame}{allowdisplaybreaks}
125 \addmetakey[yes]{frame}{fragile}
126 \addmetakey[yes]{frame}{shrink}
127 \addmetakey[yes]{frame}{squeeze}
```

We redefine the itemize environment so that it looks more like the one in beamer with Jacobs theme. We create the box with the mdframed environment from the equinymous package. Then we define the environment, read them, and construct the slide number and label.

```
128 \renewenvironment{frame}[1][]{%
129 \metasetkeys{frame}{#1}%
130 \stepcounter{slide}%
131 \def\@currentlabel{\theslide}%
132 \ifx\frame@label\@empty%
133 \else%
134 \label{\frame@label}%
135 \fi%
```

We redefine the itemize environment so that it looks more like the one in beamer with Jacobs theme.

```
136  \def\itemize@level{outer}%
137  \def\itemize@outer{outer}%
138  \def\itemize@inner{inner}%
139  \renewcommand\newpage{}%
140  \renewcommand\metakeys@show@keys[2]{\marginnote{{\scriptsize ##2}}}%
```

```
\renewenvironment{itemize}{%
            141
                      \ifx\itemize@level\itemize@outer%
            142
                        \def\itemize@label{$\rhd$}%
            143
                      \fi%
            144

                       \setlength{\leftmargin}{1.5em}%
            153
                      \edef\itemize@level{\itemize@inner}%
            154
                    }{%
            155
                      \left\{ list\right\} %
            156
                    }%
            157
             We create the box with the mdframed environment from the equinymous package.
                    \begin{mdframed}[linewidth=\slideframewidth,skipabove=1ex,skipbelow=1ex,userdefinedwidth=\s
            158
            159
                    \medskip\miko@slidelabel\end{mdframed}%
            160
                 }%
            161
            162 (/package)
            163 (*ltxml.sty)
            164 DefEnvironment('{frame}[]',
                   "<omdoc:omgroup layout='slide'>"
            165
                    "#body\n"
            166
                  ."</omdoc:omgroup>\n\n",
            167
            168 afterDigestBegin=>sub {
                   $_[1]->setProperty(theory=>LookupValue('current_module')); });
            170 (/ltxml.sty)#$
                 Now, we need to redefine the frametitle (we are still in course notes mode).
\frametitle
            171 (*package)
                  173 \fi %ifnotes
            174 (/package)
            175 (*ltxml.sty)
            176 DefConstructor('\frametitle{}',
                  "\n<omdoc:metadata><dc:title>#1</dc:title></omdoc:metadata>");
            178 (/ltxml.sty)
             We have to make sure that the width is overwritten, for that we check the
\frameimage
             \Gin@ewidth macro from the graphicx package<sup>4</sup>
            179 (*package)
                ^4\mathrm{EdNote}: MK@DG; we need to do that in the LaTeXML binding as well!
```

EdN:4

```
180 \newrobustcmd\frameimage[2][]{%
     \stepcounter{slide}%
181
     \ifframeimages%
182

193
        \vfill%
194
       \fi%
195
    \fi%
196
197 }% ifframeimages
198 (/package)
199 (*ltxml.sty)
200 DefMacro('\frameimage[]{}','\@frameimage{\includegrahics[#1,width=\slidewidth]{#2}}');
201 DefConstructor('\@frameimage{}',"<omdoc:omgroup layout='slide'>#1</omdoc:omgroup>\n");
202 (/ltxml.sty)
```

Header and Footer Lines 4.3

Now, we set up the infrastructure for the footer line of the slides, we use boxes for the logos, so that they are only loaded once, that considerably speeds up processing.

The default logo is the logo of Jacobs University. Customization can be done by \setslidelogo $\sline {ogo} {ogo} name \}.$

```
203 (*package)
204 \newlength{\slidelogoheight}
205 \ifnotes%
     \setlength{\slidelogoheight}{.4cm}%
206
207 \else%
208
     \setlength{\slidelogoheight}{1cm}%
209 \fi%
210 \newsavebox{\slidelogo}%
211 \sbox{\slidelogo}{\includegraphics[height=\slidelogoheight]{jacobs-logo}}%
212 \newrobustcmd{\setslidelogo}[1]{%
213
     \sbox{\slidelogo}{\includegraphics[height=\slidelogoheight]{#1}}%
214 }%
```

\setsource \source stores the writer's name. By default it is Michael Kohlhase since he is the main user and designer of this package. \setsource $\{\langle name \rangle\}$ can change the writer's name.

215 \def\source{Michael Kohlhase}% customize locally

```
216 \newrobustcmd{\setsource}[1]{\def\source{#1}}%
```

```
\setlicensing Now, we set up the copyright and licensing. By default we use the Creative
               Commons Attribuition-ShareAlike license to strengthen the public domain. If
               package hyperref is loaded, then we can attach a hyperlink to the license logo.
               \setlicensing[\langle url \rangle] {\langle logo\ name \rangle} is used for customization, where \langle url \rangle is op-
               tional.
              217 \def\copyrightnotice{\footnotesize\copyright: \hspace{.3ex}{\source}}%
              218 \newsavebox{\cclogo}%
              220 \newif\ifcchref\cchreffalse%
              221 \AtBeginDocument{%
              222

EdN:5

251 }%

 $^{^5\}mathrm{EdNote}$ see that we can use the themes for the slides some day. This is all fake.

4.4 Colors and Highlighting

Now, we set up an infrastructure for highlighting phrases in slides. Note that we use content-oriented macros for highlighting rather than directly using color markup. The first thing to to is to adapt the green so that it is dark enough for most beamers

```
252 \AtBeginDocument{%
     \definecolor{green}{rgb}{0,.5,0}%
     \definecolor{purple}{cmyk}{.3,1,0,.17}%
254
255 }%
```

We customize the \defemph, \notemph, and \stDMemph macros with colors for the use in the statements package. Furthermore we customize the \@@lec macro for the appearance of line end comments in \lec.

```
256 % \def\STpresent#1{\textcolor{blue}{#1}}
257 \def\defemph#1{{\textcolor{magenta}{#1}}}
258 \def\notemph#1{{\textcolor{magenta}{#1}}}
259 \def\stDMemph#1{{\textcolor{blue}{#1}}}
260 \def\@@lec#1{(\textcolor{green}{#1})}
261 (/package)
262 (*ltxml.sty)
263 #DefMacro('\defemph{}','{\textcolor{magenta}{#1}}');
264 #DefMacro('\notemph{}','{\textcolor{magenta}{#1}}');
265 (/ltxml.sty)
```

I like to use the dangerous bend symbol for warnings, so we provide it here.

\textwarning as the macro can be used quite often we put it into a box register, so that it is only loaded once.

```
266 (*package)
267 \pgfdeclareimage[width=.9em] \{ miko@small@dbend \} \{ dangerous-bend \}
268 \def\smalltextwarning{%
     \pgfuseimage{miko@small@dbend}%
269
     \xspace%
270
271 }%
272 \pgfdeclareimage[width=1.5em] \{miko@dbend} \{dangerous-bend}
273 \newrobustcmd\textwarning{%
     \raisebox{-.05cm}{\pgfuseimage{miko@dbend}}%
     \xspace%
275
276 }%
277 \pgfdeclareimage[width=2.5em]{miko@big@dbend}{dangerous-bend}%
278 \newrobustcmd\bigtextwarning{%
     \raisebox{-.05cm}{\pgfuseimage{miko@big@dbend}}%
280
     \xspace%
281 }%
282 (/package)
283 (*ltxml.sty)
284 DefMacro('\textwarning','\@textwarning\xspace');
285 DefConstructor('\@textwarning',"");
286 (/ltxml.sty)
```

4.5 Front Matter, Titles, etc

We need to redefine the frontmatter macros inherited from the beamer class for LaTeXML, since there they take an optional argument.

```
287 (*|txml.sty)
288 DefMacro('\title[]{}', '\@add@frontmatter{ltx:title}{#1}');
289 DefMacro('\date[]{}', '\@add@frontmatter{ltx:date}[role=creation]{#1}');
290 DefMacro('\author[]{}', sub { andSplit(T_CS('\@author'),$_[1]); });#$
291 (/|txml.sty)
292 % Must be first command on slide to make positioning work.
293 (*package)
294 \newrobustcmd\putgraphicsat[3]{%
295 \begin{picture}(0,0)\put(#1){\includegraphics[#2]{#3}}\end{picture}%
296 }%
297 \newrobustcmd\putat[2]{%
298 \begin{picture}(0,0)\put(#1){#2}\end{picture}%
299 }%
```

4.6 Sectioning

If the sectocframes option is set, then we make section frames. We first define a set of counters

```
300 \ifsectocframes%
     \if@part%
301
       \newcounter{mpart}%
302
       \newcounter{mchapter}%
303
       \newcounter{msection} [mchapter] %
304
305
     \else%
       \newcounter{msection}%
306
307
     \newcounter{msubsection} [msection] %
308
     \newcounter{msubsubsection}[msubsection]%
309
     \newcounter{msubsubsection}[msubsubsection]%
311 \fi% ifsectocframes
and then
312 \ifnotes\else% only in slides
     \renewenvironment{omgroup}[2][]{%
313
314
       \metasetkeys{omgroup}{#1}\sref@target%
       \advance\section@level by 1%
315
       \ifsectocframes%
316
       \begin{frame}%
317
       \vfill\Large\centering%
318
       \red{%
319
        \ifcase\section@level\or%
320
321
           \stepcounter{mpart}Part \Roman{mpart}\or%
322
           \stepcounter{mchapter}Chapter \arabic{mchapter}\or
           \stepcounter{msection}\if@part\arabic{mchapter}.\fi\arabic{msection}\or
323
           \stepcounter{msubsection}\if@part\arabic{mchapter}.\fi\arabic{msection}.\arabic{msubsec
324
```

```
\stepcounter{msubsubsection}\if@part\arabic{mchapter}.\fi\arabic{msection}.\arabic{msub
325
         326
       \fi% end ifcase
327
       \quad #2%
328
     }%
329
330
     \vfill%
331
     \end{frame}%
     \fi %ifsectocframes
332
    }
333
    {\advance\section@level by -1}%
334
335 \fi% ifnotes
336 (/package)
```

4.7 Miscellaneous

The following fixes an error I do not understand, this has something to do with beamer compatibility, which has similar definitions but only up to 1.

```
337 (*package)
338 \expandafter\def\csname Parent2\endcsname{}
        \begin{macrocode}
339 %
340 %
341 % We need to disregard the columns macros introduced by the |beamer| class
342 %
        \begin{macrocode}
343 \ifnotes%
     \renewenvironment{columns}{%
344
       \par\noindent%
345
       \begin{minipage}%
346
       \slidewidth\centering\leavevmode%
347
348
349
       \end{minipage}\par\noindent%
350
     \newsavebox\columnbox%
351
     \renewenvironment{column}[1]{%
352
       \begin{lrbox}{\columnbox}\begin{minipage}{#1}%
353
354
        \end{minipage}\end{lrbox}\usebox\columnbox%
355
     }%
356
357 \fi%
358 (/package)
359 (*ltxml.sty)
360 DefEnvironment('{columns}', "#body");
361 DefEnvironment('{column}{}', "#body");
    We also need to deal with overlay specifications introduced by the beamer
class.^6
```

 $^{-6}{
m EdNote}$: this is just to keep latexml quiet, no real functionality here.

EdN:6 EdN:7

 $^{^7{\}rm EDNoTE}$: Deyan: We reuse the CMP itemizations defined in the omdoc.cls.ltxml binding, adjusting the parameters to be overlay-sensitive

```
362 DefConstructor('\uncover', '#1');
363 #Define a Beamer Overlay Parameter type
    DefParameterType('BeamerOverlay', sub {
      my ($gullet) = @_;
365
      my $tok = $gullet->readXToken;
366
367
      if (ref $tok && ToString($tok) eq '<') {</pre>
368
        $gullet->readUntil(T_OTHER('>'));
369
      } else {
        $gullet->unread($tok) if ref $tok;
370
        undef; }},
371
        reversion=> sub {
372
373
    (T_OTHER('<'), $_[0]->revert, T_OTHER('>'));
374
375
376 #Take the "from" field of the overlay range
377 sub overlayFrom {
     return "" unless defined $_[0];
     my \sigma(s_[0]); \sigma(d+)/; $1;}
379
380
381 #Reuse the CMP itemizations, only adjust the \item constructors.
382 DefMacro('\beamer@group@item[] OptionalBeamerOverlay IfBeginFollows', sub {
     my($gullet,$tag,$overlay,$needwrapper)=@_;
     $overlay=$overlay||T_OTHER("");
384
     ( T_CS('\group@item@maybe@unwrap'),
385
       ($needwrapper ? (Invocation(T_CS('\beamer@group@item@wrap'),$tag,$overlay)->unlist) : ()) )
386
387 DefConstructor('\beamer@group@item@wrap {} OptionalBeamerOverlay',
          "<omdoc:omtext ?#2(overlay='&overlayFrom(#2)')()>"
388
           "?#1(<dc:title>#1</dc:title>)()"
389
                . "<omdoc:CMP>",
390
          beforeDigest=>sub {
391
392 Let('\group@item@maybe@unwrap','\group@item@unwrap');
    #$_[0]->bgroup;
394 return; },
          properties=>sub{ RefStepItemCounter(); });
395
396 #DefConstructor('\beamer@itemize@item[] OptionalBeamerOverlay',
           "<omdoc:li ?#2(overlay='&overlayFrom(#2)')() >"
397 #
         . "?#1(<dc:title>#1</dc:title>)()",
398 #
           properties=>sub{ RefStepItemCounter(); });
399 #
400 DefConstructor('\beamer@enumerate@item[] OptionalBeamerOverlay',
          "<omdoc:li ?#2(overlay='&overlayFrom(#2)')() >"
401
402
         . "?#1(<dc:title>#1</dc:title>)()",
          properties=>sub{ RefStepItemCounter(); });
403
404 DefConstructor('\beamer@description@item[] OptionalBeamerOverlay',
          "<omdoc:di ?#2(overlay='&overlayFrom(#2)')() >"
405
406
          . "?#1(<omdoc:dt>#1</omdoc:dt>)()<omdoc:dd>", # trust di and dt to autoclose
407
          properties=>sub{ RefStepItemCounter(); });
408 (/ltxml.sty)#$
Now, some things that are imported from the pgf and beamer packages:
409 (*ltxml.sty)
```

```
410 DefMacro('\putgraphicsat{}{}{}','\mygraphics[#2]{#3}');
411 DefMacro('\putat{}{}','#2');
412 \langle /|txml.sty\rangle
413 \langle *package\rangle
414 \ifproblems\rangle
415 \newenvironment{problems}{}\rangle
416 \else\rangle
417 \excludecomment{problems}\rangle
418 \fi\rangle
419 \langle /package\rangle
420 \langle *|txml.sty\rangle
421 DefEnvironment('\{problems}\rangle','\#body');
422 \langle /|txml.sty\rangle
```

4.8 Finale

Finally, we set the slide body font to the sans serif, and we terminate the \LaTeX ML bindings file with a success mark for perl.

```
423 \ \langle package \rangle \ ifnotes else \ fi 424 \ \langle ltxml.sty \ | \ ltxml.cls \ f ;
```
