# smglom.cls/sty: Semantic Multilingual Glossary for Math

Michael Kohlhase Jacobs University, Bremen http://kwarc.info/kohlhase

March 17, 2014

#### Abstract

The <code>omdoc</code> package is part of the STEX collection, a version of TEX/LATEX that allows to markup TEX/LATEX documents semantically without leaving the document format, essentially turning TEX/LATEX into a document format for mathematical knowledge management (MKM).

This package supplies an infrastructure for writing OMDoc gloss ary entries.

## 1 Introduction

EdN:1

# 2 The User Interface

## 2.1 Package and Class Options

 ${\tt smglom.cls}$  accepts all options of the  ${\tt omdoc.cls}$  and  ${\tt article.cls}$  and just passes them on to these.  $^1$ 

 $<sup>^1\</sup>mathrm{EdNote}\colon \mathsf{describe}$  them

## 3 Implementation: The OMDoc Class

#### 3.1 Class Options

To initialize the omdoc class, we declare and process the necessary options.

```
1 \( \*\cls \)
2 \DeclareOption{\showmeta}{\PassOptionsToPackage{\CurrentOption}{\metakeys}} \)
3 \ProcessOptions
4 \( /\cls \)
5 \( \*\text{txml.cls} | \text{ltxml.sty} \)
6 \( \# -*- \ \ \ \ \ -*- \)
7 \( \text{package} : \text{Pool}; \)
8 \( \text{use strict}; \)
9 \( \text{use LaTeXML}: \text{Package}; \)
10 \( \text{ProcessOptions}(); \)
11 \( \/ \text{ltxml.cls} | \text{ltxml.sty} \)
```

We load omdoc.cls, and the desired packages. For the LATEXML bindings, we make sure the right packages are loaded.

```
12 (*cls)
13 \LoadClass{omdoc}
14 \RequirePackage{amstext}
15 \RequirePackage{modules}
16 \RequirePackage{dcm}
17 \RequirePackage{statements}
18 \RequirePackage{sproof}
19 \RequirePackage{cmath}
20 \RequirePackage{presentation}
21 \RequirePackage{amsfonts}
22 \RequirePackage[english,ngerman]{babel}
23 \RequirePackage{smglom}
24 \langle /cls \rangle
25 (*ltxml.cls)
26 LoadClass('omdoc');
27 RequirePackage('amstext');
28 RequirePackage('modules');
29 RequirePackage('dcm');
30 RequirePackage('statements');
31 RequirePackage('cmath');
32 RequirePackage('presentation');
33 RequirePackage('amsfonts');
34 RequirePackage('babel',options=>['english','ngerman']);
35 RequirePackage('smglom');
36 (/ltxml.cls)
```

#### 3.2 Input

ginput iterates over the language bindings.

#### 3.3 For Module Definitions

```
gimport just a shortcut
                                                                   40 \newcommand\smglom@currentrepos{smglom/smglom}
                                                                   41 \newcommand\gimport[2][]{\def\@test{#1}%
