smglom.cls/sty: Semantic Multilingual Glossary for Math

Michael Kohlhase Jacobs University, Bremen http://kwarc.info/kohlhase

February 14, 2014

Abstract

The <code>omdoc</code> package is part of the STEX collection, a version of TEX/LATEX that allows to markup TEX/LATEX documents semantically without leaving the document format, essentially turning TEX/LATEX into a document format for mathematical knowledge management (MKM).

This package supplies an infrastructure for writing OMDoc glossary entries.

Contents

1	Introduction
2	The User Interface 2.1 Package and Class Options
3	Implementation: The OMDoc Class
	3.1 Class Options
	3.2 Input
	3.3 For Module Definitions
	3.4 For Language Bindings

1 Introduction

EdN:1

2 The User Interface

2.1 Package and Class Options

 ${\tt smglom.cls}$ accepts all options of the ${\tt omdoc.cls}$ and ${\tt article.cls}$ and just passes them on to these. 1

 $^{^1\}mathrm{EdNote}\colon \mathsf{describe}$ them

3 Implementation: The OMDoc Class

3.1 Class Options

To initialize the omdoc class, we declare and process the necessary options.

```
1 \( \*\cls \)
2 \DeclareOption{\showmeta}{\PassOptionsToPackage{\CurrentOption}{\metakeys}} \)
3 \ProcessOptions
4 \( /\cls \)
5 \( \*\text{ltxml.cls} \)
6 \( # -*- \ CPERL -*- \)
7 \text{package LaTeXML::Package::Pool;} \)
8 \( \text{use strict;} \)
9 \( \text{use LaTeXML::Package;} \)
10 \( \text{ProcessOptions();} \)
11 \( \/ \text{ltxml.cls} \)
```

We load omdoc.cls, and the desired packages. For the LATEXML bindings, we make sure the right packages are loaded.

```
12 (*cls)
13 \LoadClass{omdoc}
14 \RequirePackage{amstext}
15 \RequirePackage{modules}
16 \RequirePackage{dcm}
17 \RequirePackage{statements}
18 \RequirePackage{sproof}
19 \RequirePackage{cmath}
20 \RequirePackage{presentation}
21 \RequirePackage{amsfonts}
22 \RequirePackage[english,ngerman]{babel}
23 (/cls)
24 (*ltxml.cls)
25 LoadClass('omdoc');
26 RequirePackage('amstext');
27 RequirePackage('modules');
28 RequirePackage('dcm');
29 RequirePackage('statements');
30 RequirePackage('cmath');
31 RequirePackage('presentation');
32 RequirePackage('amsfonts');
33 RequirePackage('babel',options=>['english','ngerman']);
34 RequirePackage('smglom');
35 (/ltxml.cls)
```

3.2 Input

37 (*sty | ltxml.sty)

```
ginput iterates over the language bindings.
36 (ltxml.sty)RawTeX('
```

3.3 For Module Definitions

```
gimport just a shortcut
                                                39 \newcommand\gimport[2][]{\def\@test{#1}%
                                                40 \ifx\@test\@empty\importmhmodule[smglom/smglom]{#2}{#2}%
                                                41 \leq [smglom/#1]{#2}{#2}\fi
                         guse just a shortcut
                                                 42 \newcommand\guse[2][]{\def\dest{#1}}%
